MAbs: 1E11

Hybridoma clone has been derived from hybridization of Sp2/0 myeloma cells with spleen cells of Balb/c mice immunized with transmissible gastroenteritis pig virus.

Specificity: Peplomer of transmissible gastroenteritis pig virus.

MAb isotypes: IgG1 for MAb 1E11

Applications: Immunometric detection of the transmissible gastroenteritis pig virus in stool and cell culture fluids.

MAb can be used in sandwich immunoassay as coating and conjugate.

MAb can be used in haemagglutinin inhibition.

Purification: Chromatography on protein G Sepharose

Presentation: PBS, pH 7.4, 0.09 % sodium azide (NaN₃)

Storage: +4 °C (+2 … +8 °C allowed)

Material safety note: This product is sold for research use only. Standard Laboratory Practices should be followed when handling this material.

Product contains sodium azide as a preservative. Although the amount of sodium azide is very small appropriate care must be taken when handling this product.
