CATALOGUE #: 8HPV18

PRODUCT NAME: Human Papillomavirus L1 protein (HPVL1), recombinant, type 18

**Purification:** Purification is conducted from broken yeast cells by following scheme: clarification, ammonium sulfate precipitation, ultrafiltration, cation exchange chromatography, zonal centrifugation, size-exclusion chromatography, sterile filtration.

**Presentation:** 20 mM KH₂PO₄ (pH 7.2), 500 mM NaCl, 1.7 mM EDTA, 0.01% Tween-80, 1 mM 2-Mercaptoethanol

**Analysis:** Purity > 90 % (SDS-PAGE). Each lot is tested for protein content (Lowry method), lipid content (Total lipid), purity (SDS-PAGE), carbohydrate content (Anthrone method), antigen content (Immunoblot).

**Immunological activity:** Tested in quantitative immunoblot with anti-HPVL1 antibodies.

**Storage:** -20 °C (-15 … -30 °C allowed)

**Other information:** Avoid repeated freezing and thawing. It is recommended to aliquot the product after the first thawing.

**Material safety note:** This product is sold for research use only. Standard Laboratory Practices should be followed when handling this material.
