

DataSheet

CATALOGUE #: 8M50

PRODUCT NAME: Myoglobin

Source: Human heart tissue.
Blood samples from donors were tested and found to be negative for HBsAg, HIV-1 and HIV-2 antibodies, HCV, and syphilis.

Applications: Myoglobin is suitable as a reference or standard in immunoassay for early diagnosis of acute myocardial infarction, immunogen for antibody production, immunological and mass myoglobin standard, myoglobin biochemical and immunochemical studies, labeling.

Analysis: Purity > 95 % (SDS-PAGE).
Immunological activity confirmed by reaction with monoclonal antibody specific for human myoglobin.

Presentation: Lyophilized from protein solution in 20 mM Tris-HCl, pH 8.5.
It is recommended to reconstitute this product with deionized water to its initial concentration.

Storage: Lyophilized and reconstituted at -20 °C (-15 ... -30 °C allowed)

Other information: In the year 2001 HyTest's myoglobin preparation was selected by International Federation of Clinical Chemistry as an International Standard Material.

Material safety note: This product is sold **for research or further manufacturing use only**. Standard Laboratory Practices should be followed when handling this material.
